EDUCATION

BMS College of Engineering

B.Tech in Computer Science Engineering

Bengaluru

2027

Areas of interest: Full-Stack Web Development, Backend Development, Database Management Systems, Software Development, Data Exploration & Analysis

WORK EXPERIENCE

Rotaract Club of BMSCE

Club Service Director

BMSCE

Jun 2025 – Dec 2025

- Directed community service initiatives and managed club operations as Club Service Director over a 7-month tenure.
- Planned and executed service projects, driving member participation and strengthening community outreach.

Utsav'25 — Event Coordinator, Deathscape

BMSCE | May 2025

- Led setup of an interactive escape-room environment using lasers and sensor-based systems.
- Programmed C code for sensor-controlled colour transitions, enabling real-time dynamic user interaction.

SKILLS

Languages & Core: C, Python, Java, JavaScript, HTML, CSS, SQL

Frameworks & Libraries: React, Node.js, Express.js, Tailwind CSS, Framer Motion, Pandas, NumPy, Matplotlib, Seaborn

Databases & Tools: MySQL, MongoDB, REST APIs, Canvas API, Git, UI/UX Design

CS Fundamentals: DSA, DBMS, Operating Systems, Computer Networks

Soft Skills: Problem-solving, Communication, Teamwork, Time Management, Critical Thinking, Creativity, Adaptability

PROJECT EXPERIENCE

Support Ticket System

React, Node.js, Express.js, MySQL, Google Gemini AI, Tailwind CSS, Framer Motion

- Built a full-stack support ticket platform with role-based access control, real-time status tracking, priority management, and a responsive dashboard.
- Integrated a floating AI chat assistant (Google Gemini) providing contextual, page-aware support responses across the entire application.
- Engineered 13 REST API endpoints and a custom 9-component UI library with animated cards, badge systems, avatar groups, and skeleton loaders.
- Implemented rich user profiles featuring live ticket statistics, achievement badges, and a chronological activity log.

Ambulance Rerouting System

HTML, CSS, JavaScript, Canvas API

- Developed a real-time ambulance traffic simulator featuring multi-lane roads, dynamic traffic signals, and Dijkstra-based adaptive routing with travel-time learning.
- Implemented signal preemption, lane-level overtaking logic, and a live control panel for traffic density, lookahead routing, and overtaking aggressiveness.

Platform Clones — Facebook, YouTube & Netflix

HTML, CSS, JavaScript

- Built pixel-accurate frontend clones of Facebook, YouTube, and Netflix, replicating core UI layouts, navigation flows, and responsive design using only vanilla HTML/CSS/JS.
- Implemented interactive components including video cards, navbars, sidebars, and content feeds with consistent cross-browser compatibility.
